Market Commentary:

This 4.51 ct Natural Blue Sapphire displays a vivid Royal Blue hue, a highly desirable color in the market. The loupe-clean clarity with only minor inclusions significantly enhances its value, especially in stones over 4 carats. Its oval cut with very good proportions ensures optimal brilliance. Being a heated sapphire, it remains within accepted trade practices, though unheated stones typically command a premium. Features suggestive of Sri Lankan origin further elevate desirability, as Ceylon sapphires are globally recognized for their superior quality. Current demand trends in luxury markets, particularly in Hong Kong and the USA, support strong retail pricing for stones of this size and quality.
