Market Commentary:
This 2.63 ct Peacock Blue Sapphire offers a rich, attractive hue with good transparency. Its eye-clean clarity, though noted with minor inclusions, enhances desirability within this weight category. The fair oval cut provides acceptable light return but limits its brilliance compared to higher cut grades. Heating is standard in the trade and widely accepted in both wholesale and retail markets. The absence of origin certification constrains premium pricing, but demand for mid-sized blue sapphires remains strong internationally, particularly in Asian and U.S. markets. Overall, the stone aligns with stable mid-market demand, offering reliable trade and retail potential.
