Market Commentary:

This 2.76 ct Natural Blue Sapphire features the highly sought-after Royal Blue color, known for its rich saturation and brilliance. The stone is loupe clean with only minor inclusions, significantly enhancing its transparency and overall appeal. The oval shape with very good cut proportions maximizes light performance and brilliance, adding to its market desirability. Being heated, it follows standard trade practices, ensuring accessibility while maintaining strong value, though unheated stones may command premiums. Sri Lankan origin further adds prestige, as Ceylon sapphires remain benchmarks of quality in the global market. With robust demand in both wholesale and luxury retail segments, this sapphire stands as a highly marketable stone with excellent appreciation potential.
