

Professional Gem Valuation Report

Estimated Market Value Range:
USD 4,590 – USD 9,792

Market Segment	Price/ct (USD)	Total Value (USD)
Local Wholesale	825	2,524
Local Retail	1,300	3,978
International Wholesale	1,750	5,355
International Retail	2,850	8,721

Market Commentary:

This 3.06 ct Natural Colour Change Sapphire exhibits a rare and captivating shift between blue and violet hues. The loupe-clean clarity with minimal inclusions, combined with a well-executed brilliant cut, enhances both brilliance and uniqueness. Being a heated sapphire, it falls within standard trade practices, though unheated stones generally command a premium. Sri Lankan origin adds considerable prestige, as Ceylon colour-change sapphires are well regarded globally. Demand for unique and exotic gems, particularly in luxury retail markets in the USA and Hong Kong, strengthens value positioning for this stone. Overall, its rarity factor significantly boosts international retail desirability.
